

Counting twisted cubic curves on general complete intersections.
By G. Ellingsrud and S. A. Strømme. 14 pages, amslatex 1.1

This paper has been rendered obsolete by our newer eprint 9411005 "Bott's formula and enumerative geometry", which is a considerably expanded version of the same paper, in spite of the change of titles. Please download 9411005 instead, and update possible references.
